## Presentation

# Basic information

- Dany Fashion Ltd. is an Bulgarian company, founded in year 1994. We are specialized in the production of men and women knitwear as t-shirts, poloshirts, sweatshirts, sport suits, shorts, skirts, dresses, etc.
- The company has its own production base. The offices and the main production facilities are located in the town of Haskovo, in the southern part of Bulgaria and the second production factory of the company is located in the town of Topolovgrad.

- The company has many workers (approximately 100 people) including designers, technologists, cutters, tailors, ironing, quality control, packers, administration, drivers, etc. Our production equipment is entirely new and modern – we have CAM system for modeling, multiplication and preparing of markers for cutting, also we have all kinds sewing machines, etc.
- Production capacity – it depends on the technical specifications of the concrete model, but for example – 3000 pcs. of base t-shirt per day.

ironing

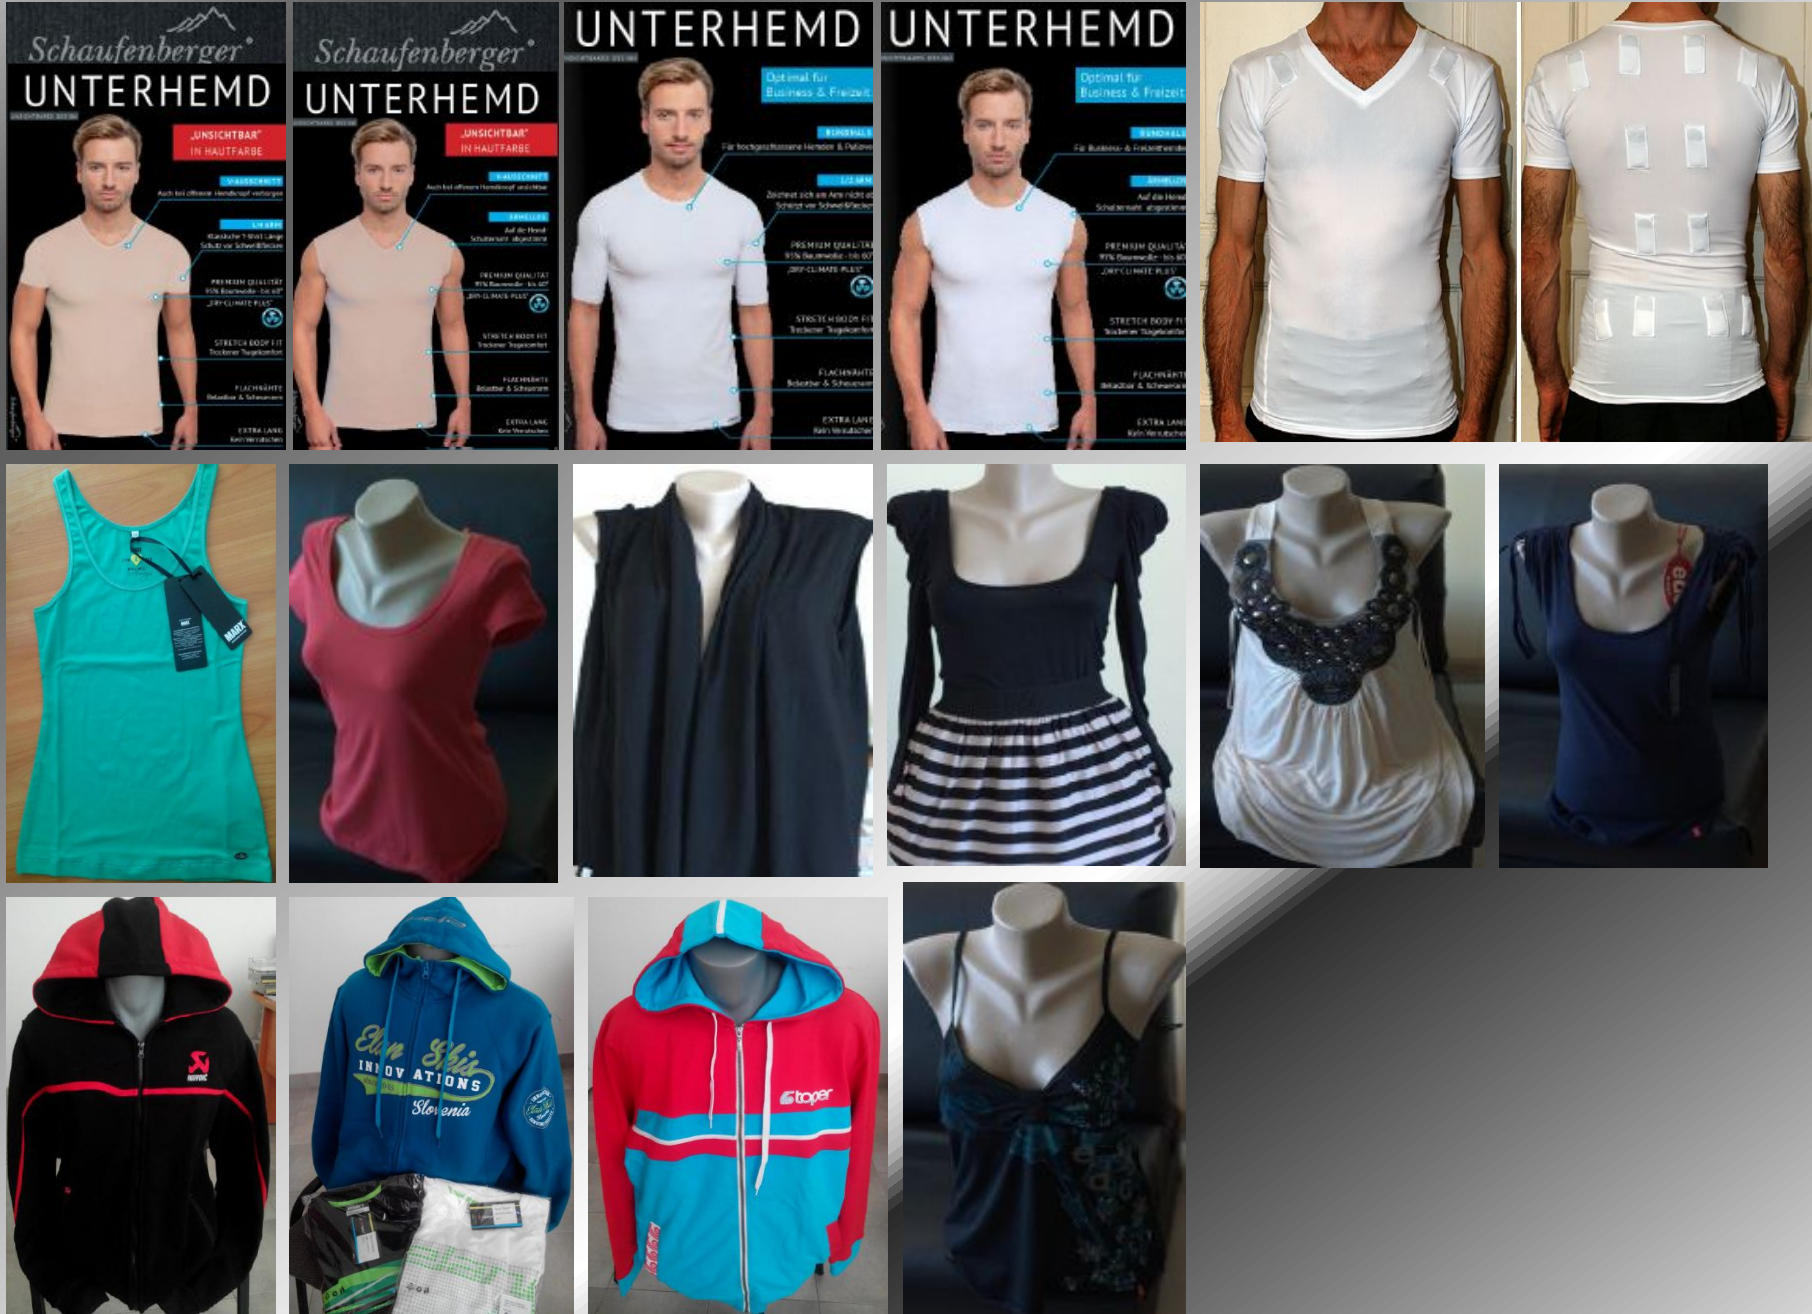

packing

- We work with materials of the client, but also for our clients we provide the following service: complete organization of the production of their collections – from the modeling of given from the client style by their original sample or a technical specification, sketch or picture, supply of materials, cutting, print, embroidery, sewing, ironing, quality control, packaging and preparing of the boxes with the ready garments.
- Our customers are famous brands like Schaufenberger - Germany ([schaufenberger.de](http://schaufenberger.de)), Mary Kay GMBH - Germany ([www.marykay.com](http://www.marykay.com)), Calida Group - Switzerland ([www.calida.com](http://www.calida.com)), Babista - Germany ([babista.de](http://babista.de)), Toper D.O.O. - Slovenia ([toper.si](http://toper.si)), Sportina D.O.O. - Slovenia ([Sportina.si](http://Sportina.si)), Roll - Net D.O.O. - Slovenia ([proteini.si](http://proteini.si)), Prim Pro D.O.O. - Slovenia, Icono - Slovenia ([theicon.si](http://theicon.si)), Esprit, L'Oreal (YSL) - France, etc.
- For our production we always use high quality materials. Each garment passes through very strict quality control and fits perfectly. We provide technological and quality control at each stage of the production process.

# Follows photos of products worked by us for our customers:

The background of the slide features a dense arrangement of vertical green bamboo stalks. Interspersed among the bamboo are several cotton flowers in various stages of bloom, showing white petals and brownish centers. The overall aesthetic is natural and eco-friendly.

Dany Fashion has also its own collections with the trade mark “Reflex”. Every season we develop a new collection. We produce eco-friendly clothes on bamboo ground printed in designs on the technologically new digital printers with eco-friendly dyes.

- **LET’S RETURN THE NATURE IN THE SPORT!**
- Our team, as a result of years of experience in the production of many leading European sport brands, has developed and patented eco-material from natural fibers with which the active sportsman in his normal everyday life also to feel good and comfortable in our garment.
- The bamboo/cotton/elastane is our alternative to the invasion of all “high tech” polyesters, polyamides and nylons, which exhaust and strain the human body in the sports.
- Features of the bamboo:
- Elasticity – not worse than the polyester;
- Breathable – it absorbs the perspiration and takes it out thanks to its cellular structure;
- Antibacterial/antiallergenic – thanks to the way of growing (without pesticides) and the bio-agent, which the bamboo thread contains in its composition;
- Bamboo kun – the bacteria do not survive in this structure and the odors are absorbed and released out;
- Extremely soft to touch and feel thanks to the cotton blending.

- **Features of the cotton:**

- Insulating features – thanks to its structure it keeps warm in the winter and in the summer - cool;
- Absorbtion – it takes up to 20% water without looking wet and after that it takes the excess moisture from the body;
- Strength – it is resistant to pulling and crushing;
- Elasticity and softness;
- Antiallergenic;

- **Features of the elastane:**

- The elastane is the only unnatural ingredient of our material. But with it we solve the problem with the shrinkness after washing and the long life of our garment
- The elastane creates comfort while wearing and thanks to it after washing we can wear the garment even without ironing.

- **Digital print:**

- This modern technology of printing on raw fabric practically gives us unlimited opportunities for design on the garment. We carry your ideas and modern designs on the garment, printing with quality of a photo each idea. All dye and treatments are with antiallergenic and nature-friendly status and with the relevant certificates.
